

You can connect to academy applications using the iPad. This will let you work on the iPad as if you were using a normal desktop PC. Just follow these instructions to set it up.

1. First make sure the iPad is connected to the internet, and you can see websites properly. Test it by opening up **www.bbc.co.uk**
2. Check if you already have an App installed called RD Client with the icon in the picture. If you do, skip to step 5.
3. Next go to the App Store and search for the App called: **Remote Desktop**.
4. Install the App using your iTunes password.
5. Run the app.
6. Click the + in the top right corner.
7. Choose > **Add Remote Resource Feed**
8. In the feed URL box, copy and paste, or type the following address (be careful as it is long!)

**[apps.skimmerskentacademy.org.uk/rdweb/feed/webfeed.aspx](https://apps.skimmerskentacademy.org.uk/rdweb/feed/webfeed.aspx)**

9. Press Done
10. Press 'User Name and Password'
11. Press 'Add User Account'
12. Put your username in the top box, and your normal computer password in the bottom box (not your iTunes password).
13. Press Save
14. Press Save again
15. You should see all the apps you can use! Give them a try. They will work in school and at home.

If you have any problems you should bring the iPad to **E004** at lunch time and see Mrs Weller.
