## FACILITIES MANAGEMENT AT THE ACADEMY

Graham FM, providers of the Academy's facilities management, have once again been awarded the coveted ISO 9001/ 4001 (International Standards Organisation) accreditation in Safety, Health, Environmental process and Quality of systems.

ISO9001:2015 is an International Quality Management Standard which companies can use to demonstrate their ability to meet their customer's requirements. In order to meet the requirements of the Standard, businesses need to have in place a documented Quality Management System and to be able to demonstrate its implementation and ongoing practice. Achieving accredited registration to ISO9001:2015 not only improves the efficiency of businesses but also in their client partnership delivery. ISO accreditation is only awarded after successfully completing a rigorous examination of a provider's quality systems and processes and further represents the ongoing commitment to excellence of facilities management delivery to the Academy by Graham FM.
